

ATLA Religion Database: Scripture Citation Searches

ATLA RDB will permit you to search for articles and essays about a specific scripture passage.

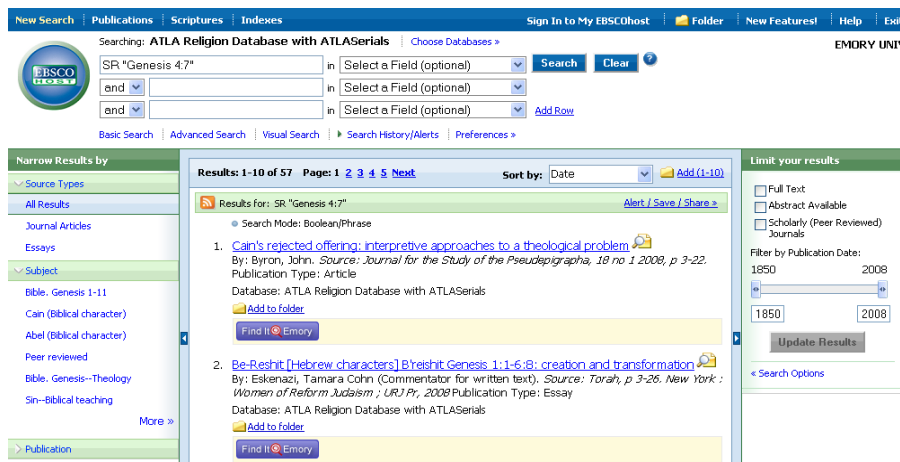

1. Click the Scriptures link to begin.

2. The expandable index will be displayed.

Clicking on the chapter will select that chapter and display related articles; Expand will show the verses. When a verse is selected all articles related to that verse will display.

3. To find a range of verses, move one level higher in the hierarchy, select the chapter level, and narrow by topic.

The screenshot displays the EBSCOhost search interface. At the top, the search bar contains the query "SR 'Genesis 4'" and the database "ATLA Religion Database with ATLASerials". The search results are displayed in a list format, showing two articles. The first article is titled "Am I my brother's keeper?" and the second is "Cain's rejected offering: interpretive approaches to a theological problem". A red arrow points from the text above to the "Cain (Biblical character)" option in the "Subject" filter on the left side of the interface.
